

The background of the image is a scenic landscape of the Rhodopes mountains in Bulgaria. In the foreground, there are several bright yellow flowers with green buds, likely a species of poppy or similar wildflower, growing on thin stems. The middle ground shows rolling green hills and valleys, partially obscured by a light haze. In the far background, the dark, rugged peaks of the Rhodopes mountains rise against a clear blue sky with a few wispy white clouds. The overall lighting is bright and natural, suggesting a sunny day.

ECO VILLAGE

"SACRED LAND"

THE RHODOPES, BULGARIA

ECO VILLAGE "SACRED LAND"

GENERAL INFORMATION

Hills of the Rhodopes

On a terrain of over 14 000 sq m, situated high in the mountains, just next to a lovely pine-tree forest, with wonderful panoramic views to the Rhodopes' hills, turned to the south-east and lit by the sun, the investors and the team of designers, engineers and specialists in ecology and tourism has created a stylish and charming holiday village, conforming to the cultural traditions and natural distinctiveness of the region.

One of their main purposes is to preserve the area wild life and all the advantages that authentic peculiarities render. Every detail in this village is designed with particular attention to maintaining and developing the harmony

The village of Borovo

of the surroundings. All buildings and facilities and the services that have been intended will not cause any negative impact to the idyllic ambience that reigns over this place.

The basic function of the eco-village is a place for recreation and entertainment among unspoiled nature and fresh mountain air, with a total capacity of about 80 guests.

The complex is designed so, that it will satisfy the expectations for many different types of visitors. It will be appropriate for mountain and countryside lovers, enthusiastic athletes or foreign tourists wanting to get acquainted to the local customs, for family vacations, business meetings or excursions with friends.

Rhodopes' meadows

Guests will relish the silence of the village that is so longed in the hectic daily activities of the big city.

To the romantic and sensitive characters, the area will offer many incomparable delights, such as drinking a glass of good wine, watching the sunset over the mountain tops and listening to the crickets. Or waking up by the sun beams, the morning song of bird and the aroma of herbal tea sweetened with forest honey. Or admire the unbelievable views to a sea of hills and valleys, pine forests, meadows with herbs and flowers, watching the busy work of the bees, the frivolous flight of the butterflies and the calm pasture of the sheep.

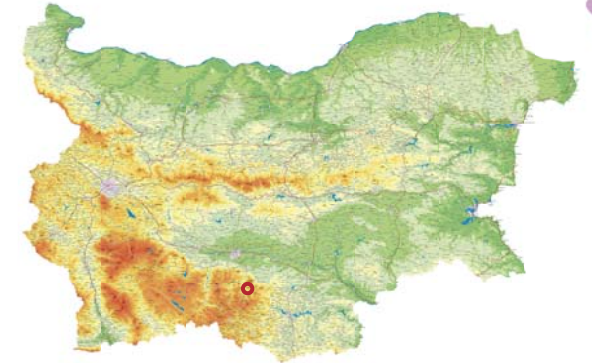

A look from the village of Borovo to the distinguishing silhouette of the opposite ridge

The place is settled on a picturesque slope in the area of Koritoto, Borovo village, in the municipality of Laki. The landscape of alternating high hills and crouched valleys is absolutely fabulous.

It is located in the highly cut Prespanski part of the Rhodopes, 200 km away from the capital Sofia and 54 km from the main district city Plovdiv. It is near the Bachkovo Monastery, the ski resort Pamporovo and the holy place Cross Forest. The spot is near the wonderful gorges of the rivers Belishka and

The charming chapel, raised on one of the hills near Borovo

Manastirska, which are feeders for the beautiful river Chaya, and is also a perfect start for wonderful excursions in the Rhodopes.

The nearest settlement is the village of Borovo, which is 700 m straight North-West.

Stone houses with the rocks above Borovo

Old houses in typical Rhodopes' style

The nestling among hills and pine-trees village

Borovo is a small and neat village with only 100 year round residents, all of them

Church of Borovo "The Assumption"

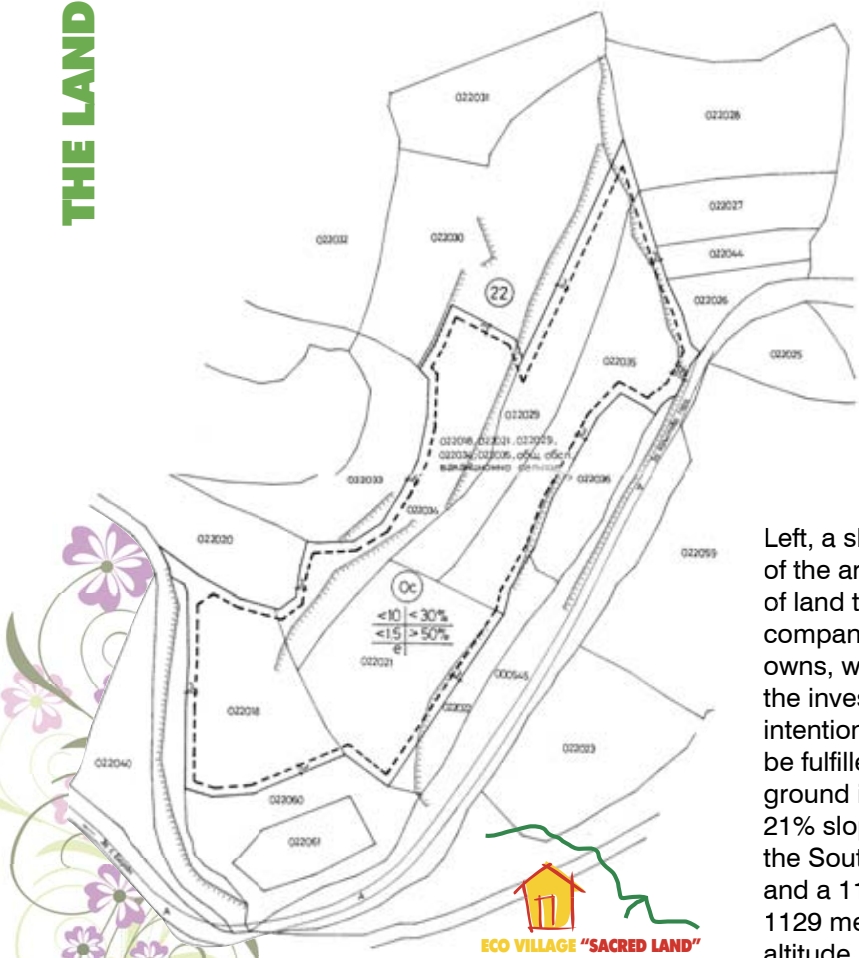

Christians. It is crouched high on the South part of a hill at around 1140 m altitude. The village has a long and interesting history, which the locals will tell you with good grace. In ancient times, Thracian tribes and families lived there and conducted their sacred rituals. The rocks above the village have been depicted with many figures by nature or may be by a secret power. They are sedimentary and the oldest in Bulgaria as the earth surface there had once been sea floor before it raised and formed the mountain range of the Rhodopes.

Since very ancient times people, connected to the area of Borovo and Cross forest, have always known and felt a strong presence of

energy. The life in the mountain has made the locals tough but noble.

Over the last couple of years, Borovo has begun its resurgence and development in order to be able to welcome more tourists and to offer them a unique holiday experience.

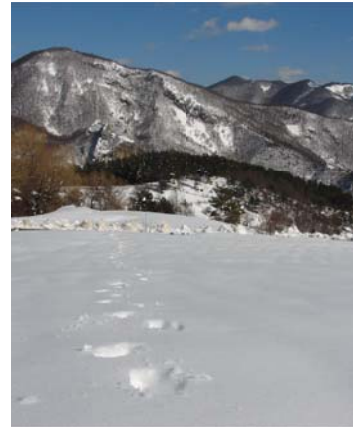

Specific old stone houses reveal the character of Borovo. One of the natives' most significant buildings is the stone Church, proudly set in the middle of the village. The Major and the inhabitants of Borovo have been devotedly trying to keep the authenticity of the village in tact. The old traditions, the rustic way of life and the Rhodopes' culture are still very much centered to the local community.

Left, a sketch of the area of land the company owns, where the investment intention will be fulfilled. The ground is with 21% slope to the South-East and a 1137-1129 metre altitude.

The road to "Sacred land"

The eco-village site, covered with snow

A view from the eco-village site to the surrounding mountains

The land in winter

The main investor of the project is "Sacred Land" Ltd.

Mr. Michael Ian Butterfield, Chairman and CEO of the company, is a successful international businessman with notable experience and interests in various large industrial projects. However, he is an adventurer and has never lost his special attitude to different cultures and wild nature. He has always looked for unique places and tried to keep and promote the beauty of the peculiarities in the world.

In 1991 he visited Bulgaria, found it exciting and loved the country. More frequent visits

followed soon after. Later, he discovered this majestic place in the Rhodopes and decided to start a project for creating a unique eco-village.

Mrs. Dyana Dafova - Butterfield, Deputy Chairman and CEO, is an internationally renowned singer and composer. She owns and manages her own company, whose main activities are connected to music and culture, namely the creation and popularization of musical developments; organizing events, concerts, spiritual discussions; distribution and publishing. Her company contributes significantly to enlarging cultural exchange between countries by initiating projects abroad.

Michael and Dyana Butterfield

Mr. and Mrs. Butterfield arrange private tourist excursions and other entertainments for relaxation. Meanwhile they participate in projects for the preservation of cultural heritage in Bulgaria.

Their latest mutual initiative is the building of an eco-village, which they have named "Sacred land", in one of the scenic mountain areas in Bulgaria. It is located on the territory of Borovo village in the Rhodopes, where the family of Mrs. Dafova has very deep roots. The project started first as an idea in 2007. Then they carefully chose and purchased the land, gathered a professional and trusted team and quickly started developing the project.

The complex will include everything, necessary for spending a relaxing time away. It consists of 11 pretty houses for accommodation and a central building. The total built up area is planned to be around 3000 sq m on two levels.

All the buildings will be low, solid and joined

by a common architectural style in the spirit of the Rhodopes' tradition. They are in unison to the untouched surroundings and the relief particularities. Natural materials like wood and stone will form the main composition.

LAND DEVELOPMENT

The general appearance of the whole village is complemented by a specially designed park environment, utilizing the natural terrain incline and the positions of the dwellings, including terraces, green lawns for picnics, a children's playground, flower beds, a fire place, walking alleys and special lightning for romantic nights outside.

LEGEND

1. Car park
2. Central Hotel Building
3. Chapel
4. Open stage
5. 4 luxury double modules – 2+1 residents
6. 3 houses for 8+4 occupants
7. 3 semidetached houses – 2 x (4+1) residents
8. Staff building
9. Switch gear kiosk
10. Barbecue corner

THE CENTRAL HOTEL BUILDING

The central building will be the focus of the village and will contain the main reception. It will house several luxury apartments and office space and will deliver additional services to the guests of the complex. A cozy lobby with a bar will be the first port of call for the guests for a cup of coffee or rest.

Two main complexes in the central hotel building include the business center and a centre for sport and relaxation. The business centre will offer all the necessary conditions and equipment for active work. You will be able to stay connected with your business and partners anywhere in the world additionally. There will be a conference room for seminar use.

The complex for the free time will offer many different opportunities for sport activities and relaxation, including a gym hall, a sauna, a steam room and hot tubs. The entire cycle of relaxation will be complemented by spa, aroma and massage procedures. In addition to all this,

visitors will be able to use our beauty centre and the shop for natural and herbal cosmetics.

The harmony of your stay at the complex will be supplemented by an exquisite restaurant, providing local and foreign culinary specialties in a pleasant atmosphere and with excellent

service. On top of this, you will have the fantastic opportunity to try home made, natural and fresh products.

The visitors will be able to taste many different kinds of quality wine from our cellar selection in a special atmosphere.

RESIDENTIAL AREA

The residential zone is separated into several parts, conditionally: luxury villas in the middle and houses with apartments.

There will be three types of two-floor houses available. The design of these houses have been considered with variety in mind, so that different visitor needs will be satisfied.

A: houses of 150 sq m with two one-bedroom luxury maisonettes;

B: 200 sq m floorage family villas with two maisonettes, consisting two bedrooms each, sheltered parking, with the highest level of comfort;

C: on the first line, two floor houses for friends, with 4 bedrooms, separate bathrooms, a common kitchen and a living room and total floorage of 300 sq m.

INFRASTRUCTURE AND INSTALLATIONS

The village will be equipped with all the necessary service networks. With the future and ecological preservation in mind, the engineering team has thought for clean and nonwaste solutions. Alternative energy supply is important, so appropriate solar panels and a

wind-generator will be installed.

Every house will be surrounded by grass lawns, flowers and by the tranquility of the mountain.

The different zones will be bordered by inner paths. Parking is conveniently planned with places for cars in front of the hotel, next to the main entrance or in private sheltered at the villas.

PAVILION OF LOCAL CRAFTS

Local crafts will be fittingly presented in a souvenir pavilion of Bulgarian and folk arts.

PICNIC ZONE

The picnic zone is close to a small cave, on a natural semi-open space in the forest. There will be ideal spots for rest with wooden tables, benches and lounges available, as well as a charming corner for barbeques.

CHAPEL AND OPEN STAGE

In harmony with the strong magical power of the region, the investor has intended to build a chapel and an open stage in the middle of

the complex for different cultural and spiritual performances. The place will use the natural amphitheatrically formed place with a perfect view of the artists and to the surrounding mountains.

Here, in the nature, at the very heart of the mountain and in the spirit of old traditions, authentic singing, dancing and painting arts will be presented. Bulgarian and foreign guest artists will present their performances under the romantic sky of the Rhodopes. There will be a place for contemporary valuable arts as well.

SPORTS AND OUTDOOR ATTRACTIONS

Visitors will find equipment available for outdoor sports as a very pleasant and useful addition to the complex. They will be able to choose between silent games such as chess, cards, etc. or to play football, volleyball, or badminton, paintball or archery in the forest and enjoy jogging and mountain hiking in fresh air.

The residents can enjoy an authentic country lifestyle. They will be able to visit a farm yard with domestic animals and will have the opportunity to experience the feeding and breeding of birds and herbivorous. The braver ones can try horse-riding or cycling in the mountain.

SCENERIES FROM THE RHODOPES

"The Wonderful Bridges", the small bridge

The municipality of Luki is situated in the highly crossed North-East Prespanski part of the West Rhodopes. It borders to the municipalities of Assenovgrad, Chepelare, Smolyan and Banite.

The region is situated in the picturesque gorges of the rivers Manastirska, Belishka, Dryanovska, Yugovska and Lukinska. The average altitude is 850 m. Due to the rugged country side, the settlements vary from 634 to 1600 m. The average annual temperature is 11,5°C. The relief is typically mountainous and is a labyrinth of hills of different lengths and directions, which is a premise for fresh summer months. The region is rich in beautiful karst forms. There are lots of resources for tourism. Here is a part of the biosphere preserve "The Red Wall", which is acknowledged by UNESCO.

A butterfly on thyme flowers

Wild strawberries on the site of the eco-village

"The Wonderful Bridges"

Other natural sights are "The Wonderful Bridges" on the Dulbok Dol river, the waterfalls "Guimbiurtiyata" on the Belishka river, "Holy Spirit" on the Manastirska river and "Slivodolsko padalo" near village of Yugovo.

The clear air and the variety of beautiful panoramas, the limpid river waters, wonderful metamorphic rock formations among long standing forests and flower meadows create the extremely gorgeous landscape.

Red deer

According to the evaluations, the biologic diversity is a basic resource for alternative tourism, as the Rhodopes are the biggest mountain massive in Bulgaria with the most representatives of flora and fauna and extraordinary potential of natural gifts. There are 7 natural reserves in the region, 5 protected areas, 24 natural landmarks. Here, remarkable paleo- and neo-endemism species for our country and for the Balkans can be observed, for example, a beautiful Rhodope orchid, the Orphic flower and many others herbs and flowers. Over 2 000 supreme plants are to be found: 60 and 130 year old European Black pine plantations, 80-150 year old fir-tree beech. There can be found representatives of Black pine, Beech, Scots pine, Manna-ash, Hornbeam, Maple, Osier and other kinds, different bushes, giving delicious fruits rich in vitamins, such as hips, blackberries, hazelnuts, etc. Mordant mushrooms, wild strawberries and blueberries and healing herbs attract many tourists and lovers of wild nature. Notorious is the curative effect of the Rhodopes' honey, which has collected a bouquet of herbs, flowers and wood species and has caught the earth minerals and fresh air.

Brown bears

The animal world is extremely rich. Together with the simple representative of our fauna, here are to be found, in their natural environment, the Brown bear, Chamois, Mouflon, Wolf, Red deer, as well as the protected imperial eagle, raven, otter, rock lizard, salamander, tree-frog, grass-snake, tortoise and a wide variety of birds.

Green pasture of sheep

Horses on the side of "Batak" dam

In the North-East part of the Municipality, here is the State game breeding station "Kormisosh" with excellent conditions for hunting tourism. Permits for hunting of bears, wild boars, deers, mouflons, wood-grouse capercalzie and others could be granted.

For those, who do not like to hunt, horse riding or walking on goat paths, outings to "Akva tepe" - a steep rock, where the biggest population of Wild goats lives, to "Hambar dere", "Haidushki polyani" or to the bear reserve in Belitza are offered. Another possibility for entertainment is to go for a photo-safari!

CAVES, DAMS & RIVERS, WATERFALLS

There are also several quite big dams in the Rhodopes, where daily excursions for fishing could be very pleasant and relaxing.

The Lake of Luki

Stalactites in the cave "Yagodinska", "A mouth of a monster" formation

In this part there are also karst gorges, breathtaking by their dizzying rock wreaths - Bouinovsko, Trigrad, the gorges Chaira, Gerzovitsa, and Mostova Soushitsa Rivers. Beautiful caves like: Yagodinska, Dyavolskoto Gurlo (the Devil's Throat) and Haidoushka (in Trigrad Gorge), Snezhanka (Snowwhite) above Peshtera, Lednitsata (Ice House), etc. Other interesting formations are "The Devil's Bridge" - a nature phenomenon in the Gorge of Bouinovo; "The Elephant" rock - a part of the Caravan rock formation by Devin; Orpheus's Rock on Ouspa peak above the town of Smolyan.

The waterfall "Duplevoto" near Orehovo

The entrance to the Cross forest

CROSS FOREST

Just 6 km away from Borovo, the Monastery complex “Cross forest – Holy Trinity” is situated.

This place, 1545 m above the sea-level, 500 m long and 300 m wide, is a round meadow, surrounded by thick pine forests. The panorama view from here is a stunning sea of peaks and hills in the distance.

During the years, due to the healing water of the Holy spring and the legend about the buried piece of the Holy Cross, the newly built monastery has been gaining a widespread popularity as a worship place for Christians and international visitors.

The legend says that there was a large monastery on this place, where a piece of the Cross of Christ was kept, which had been the possession of the Turkish sultan once, which had been kept in his treasure-house in Constantinople.

The old church of Cross forest

In 1936 Bulgarian Tzar Boris III and one of his colonels with the help of the people of Borovo raised a 66-kilogram metal cross on Cross peak, which was then sanctified. It remains as one of the Christian Holy sites of the world to be visited.

BACHKOVO MONASTERY

The Monastery of Bachkovo is an important monument of Christian architecture and one of the largest and oldest Eastern Orthodox monasteries in Europe. It is located on the right bank of the Chepelare River, about 12 km from Borovo. The monastery is known and appreciated for the unique combination of Byzantine, Georgian and Bulgarian culture, united by the common faith.

The monastery was founded by Prince Gregorios Pakourianos, a prominent Georgian statesman and military commander in Byzantine service in 1083. During the time of the Second Bulgarian Empire, Bachkovo Monastery was patronized by Tsar Ivan Alexander, whose image is painted

The Bachkovo monastery

on the arches of the ossuary, which has survived from the monastery's original structure with a specific architectural design and ancient frescoes.

The mural paintings of the refectory by an anonymous author bear a significant artistic value. Here is to be found the fresco of the Doomsday, painted by the famous Bulgarian iconographer Zahari Zograf in 1850, which is thought of as one of the most interesting works of art of the Bulgarian National Revival.

The Cathedral Church of the Virgin Mary (dating from 1604) is the place where a valuable icon of the Virgin Mary from 1310 is kept. According to the legend, the icon is wonder-working, attracting many pilgrims every year.

The museum of the monastery has a rich exhibition of church plate, icons, books, the sword of Friedrich Barbarossa, a sultan's firman from 1452 and a wood-carved cross with miniatures.

The Cloisters of Bachkovo monastery

ASSEN'S FORTRESS

"Assenova krepost" is a medieval fortress in the Rhodopes on a high rocky ridge on the left bank of the Assenitsa River.

The earliest archaeological findings date from the time of the Thracians, the area of the fortress being also inhabited during the Ancient Roman and Early Byzantine period. The fortress gained importance in the Middle Ages. It was conquered by the armies of the Third Crusade.

It was considerably renovated in the 13th century during the rule of Bulgarian Tsar Ivan Assen II to serve as a border fortification against Latin raids, as evidenced by an eight-line wall inscription.

The best preserved and most notable feature of Assenova krepost is the Holy Theotokos of Petrich Church from the 12th-13th century. It is a two-storey cross-domed single-naved building with a wide narthex and a large rectangular

The Church of the Assen's fortress

tower, and features mural paintings from the 14th century.

BELINTASH

Belintash rock phenomenon lies in the heart of the Rhodope Mountains and is an imposing rock, shaped as a small plateau of around 300 m length. Some say the name of the rock plateau means "stone of knowledge", others hold it means "rock of war", and there are people who think Belintash as the Rhodopes' Stonehenge.

The southern side of the phenomenon looks like a human profile that is believed to protect the unique natural phenomenon from treasure-hunters and malevolent visitors. According to some explorers the human handmade work here represents one of the oldest astral maps, dating back to 7,000 years ago.

Belintash was an ancient Thracian sanctuary and is probably the only one in Bulgaria related to god Sabazios worshipped

A view to the Assenovgrad from Assen's fortress

*Left: A 14th-century donor's mural portrait of Tsar Ivan Alexander in the ossuary
Right: The wonderworking icon of the Virgin Mary in Bachkovo monastery*

The Chaya river

The rock of Belintash

by the Thracian tribe Bessi, who once inhabited the site. Sabazios is the god, later called Dionysos by the Greeks – the god of fertility and wine. On an upper flat platform of the rock at 1225 m altitude have been deeply carved round holes, furrows, bays, steps. According to historic data, here the ancient people committed sacrifices and auguries.

At the foot of the mountain a silver sanctuary plate of the god was found. It represents Sabazios sitting on a throne against the background of snakes creeping upwards, showing the upward development of the human being and the circle of life.

Local men say the magnetic field here is very strong and it is quite dangerous to stand on the plateau during thunderstorms.

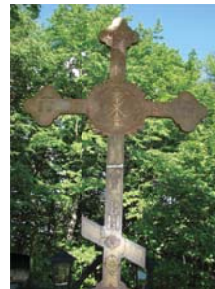

Here is to be seen the so called Inscription of Belintash, confirming the thesis that our ancestors from the Rhodopes had had scripts earlier than the Greeks.

The white chapel of Borovo

MORE

The church “Sveta Troitsa” (Holy Trinity) in the village of Yugovo from 1842 is another cultural memorial. It is a three-ship pseudo-basilica with an outer gallery and a stone bell tower. Its interior keeps icons, carvings and wall-paintings from XIX-th century.

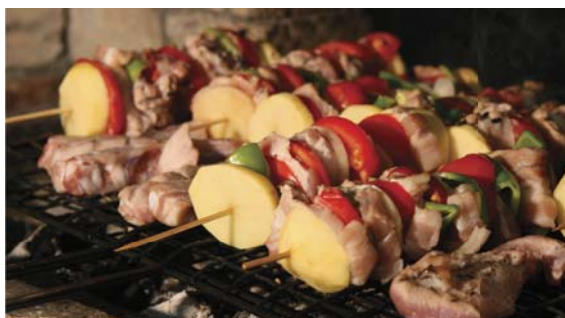

The metal cross of Cross forest, gifted by Tzar Boris III in 1936

The traditional Rhodope meals, prepared of ecological potatoes and kidney beans are the richness of the region. The recipes for the Phodope 'patatnik' with white cheese and butter have gone everywhere in the world, but here is it the most delicious. You can ask for sesame rings, round loafs and hominy in every house and they will be served with thick fresh yogurt or homemade jumble at any time. You can sweeten by choose with an aromatic jam of wild strawberries, raspberries or blueberries.

The many-coloured beans with special types of sausages, soups and many airs and graces with no names in English are parts of the offers. If you find a hunter, you should definitely try game meat.

The famous Rhodope barbeque, you can turn on a spit in the mountain among bird songs and drawing bagpipe sounds. You will wake up early in the morning with smell of aromatic tea, combined thyme, peppermint, balm, tutsan, goose-grass, milfoil and many others, which you can also

pick up by your own, according to the period of the year.

Here, you can taste the most delicious homemade dishes from ecological products, obtained in small farm-yards or directly from the forest, such as wild mushrooms, mountain honey, etc. Thick and aromatic red wine will enhance the taste of every Rhodopes' meal and make your blood boils.

Folk singer Valya Balkanska and bagpiper Petar Yanev are one of the emblems of Rhodope's Mountain ethno-musical region

The Rhodopes embrace not only with its dignity but also with its magic sounds. This music was born by the hard times, strong emotions and rich mentality of the people of the Rhodopes. The songs are slow, sensual and mystic.

The wedding songs have been very important part of the ceremony. The instruments that are to be heard here are bagpipe, pandore and shepherd's pipe.

Traditional 'Caba'-bagpipers blowing near village of Shiroka Luka

The Rhodopes are sounded by the typical for this region 'caba'-bagpipe with longer drone, lower, drawling, bass tune. From the distance, the brazen shepherd's bells may make you forget about the time and space.

The chain dances of the Rhodopes are smooth with firm steps, squatting, kneeling and cries.

Every year in the Rhodopes take place meetings of large

families with different religion and roots in this region. People respect and keep alive the customs of their great parents. Here, a culture of a deep sensitivity and old traditions can be touched.

The greatest acknowledgement about the strong impact of the Rhodopes' song is the fact that namely it has been transmitted into outer space by NASA, because its vibrations correspond to the frequencies of the Universe.

THE RHODOPE MOUNTAINS

This is a unique mountain chain, considered by the Indian meditation schools as one of the 7 sacred mountains on the Earth, the oldest land on the Balkan Peninsula. The Rodhope Mountains is situated along the Maritsa and Mesta rivers valleys. The highest peak is Goliam Perelik – 2191 m. which is situated in the Mursalitsa hill. Other high peaks in Rhodopes are Goliama Skotka, Malka Skotka, Persenk, Goliam Persenk and Batashki Snezhnik.

ORPHEUS

The legend says that the mythical Thracian singer Orpheus, who wield great power in the Rhodopes, played his lyre with such an inspiration that even wild beasts and trees were charmed by his music. When you come here you will inevitably realize that it is the beauty of the nature around that inspired him. It is believed that the Grave of Orpheus is near the village of Tatul in the Eastern Rhodopes.

THE ORPHIC FLOWER

A unique plant of over 10 000 years, survived maybe the Ice age, grows in the Rhodopes. Its botanic name is *Haberlea rhodopensis*, known by the locals as Silivryak or Orphic flower. Although it is not a desert species, the silivryak is a world record-holder in long lasting in drought. It can live 31 months in a herbarium and after this to be moistened and revived. The legend tells that the little flower with gentle mauve blossoms germinated from the tears of the mythical Rhodopes' singer Orpheus, who sorrowed inconsolably over his beloved Eurydice, disappeared forever in the Underworld. *Haberlea rhodopensis* has been investigated by NASA and Russian secret laboratories due to its extraordinary qualities.

THE SONG OF THE RHODOPES

One of Bulgarian most beautiful and beloved folk songs from this region flies through the Universe, chosen by NASA as a message to extraterrestrial civilizations.
